

Junliang “Julian” Tao

PhD, Associate Professor

Curriculum Vitae

August 2024

📍 School of Sustainable Engineering and the Built Environment,
Arizona State University, AZ, 85286

Education

PhD	Civil Engineering	Case Western Reserve University	Cleveland, US	2013
MS	Civil Engineering	Tongji University	Shanghai, China	2009
BS	Civil Engineering	China University of Geosciences	Wuhan, China	2006

Experiences

2022	Guest Professor , Institute of Geotechnical Engineering, University of Natural Resources and Life Sciences (BOKU)
2018–	Associate Professor , School of Sustainable Engineering and the Built Environment, Arizona State University
2013–2018	Assistant Professor , Department of Civil Engineering, University of Akron

Selected awards and honours

2017 CAREER Award, National Science Foundation
2017 Young Engineer of the Year Award, American Society of Civil Engineers, Akron Section

Professional Membership and Service

Associate Member	American Society of Civil Engineers (ASCE) Geo-Institute
Member	Institute of Electrical and Electronics Engineers (IEEE)
Member	International Society for Soil Mechanics and Geotechnical Engineering (ISSMGE)
Member	Society for Integrative and Comparative Biology (SICB)

I have participated in organizing or chairing 20 technical conferences or sessions, served on 12 technical committees, and reviewed for 32 journals, 3 funding agencies. I also volunteered in 15 outreach activities.

Relevant Publications

Since 2009 I have authored 116 research publications, including 45 journal papers, 66 conference papers, and 5 technical reports, co-edited 3 books, and filed 2 patents. I also have delivered 34 invited talks to universities, local, national and international conferences. As of August 8, 2024, my h-index is 18 and i10-index is 34, with total citations of 1,576. Relevant Qualifications, Capabilities, and Experiences

I am the director of the research group Bio-inspired Geotechnics (BiG) in the NSF Research Center for Bio-mediated and Bio-inspired Geotechnics at Arizona State University. We seek the answers at the boundaries of biology, mechanics and engineering. We achieve the BiG goals and extend the impacts from research, teaching, outreach, entrepreneurship and collaboration. Our Current research topics include: bio-inspired self-burrowing robots, bio-inspired underground sensing and communication, bio-inspired sustainable countermeasures to natural hazards.

I have secured about \$2M awards as a PI, published over 100 research papers, mentored about 20 graduate students, about 30 undergraduate and high school students, and a number of high-school teachers. Among all my mentees, about 1/3 are from underrepresented groups.

My leadership is demonstrated through organizing the upcoming International Conference on Bio-mediated and Bio-inspired Geotechnics, and co-editing several proceedings and special journal issues in bio-inspired geotechnics.
